

Doing Your Literature Review: Traditional and Systematic Techniques

By Dr. Jane Smith

A literature review is a critical analysis of the published research on a particular topic. It is an essential part of the research process, as it allows researchers to identify and evaluate the existing body of knowledge on a topic, and to identify gaps in the research that need to be addressed.

There are two main types of literature reviews: traditional and systematic. Traditional literature reviews are more narrative in nature, and they typically focus on a small number of studies that are relevant to the researcher's topic. Systematic literature reviews, on the other hand, are more rigorous and comprehensive. They involve a systematic search of the literature, and they include a detailed analysis of the findings of the studies that are included in the review.

This book provides a comprehensive overview of the traditional and systematic techniques used in literature reviews. It includes step-by-step instructions, examples, and tips to help researchers conduct effective literature reviews. The book is divided into two parts:

- Part 1: Traditional Techniques
- Part 2: Systematic Techniques

Part 1 of the book covers the traditional techniques used in literature reviews. These techniques include:

- Identifying and selecting relevant studies
- Critical analysis of studies
- Synthesizing the findings of studies
- Writing a literature review

Part 2 of the book covers the systematic techniques used in literature reviews. These techniques include:

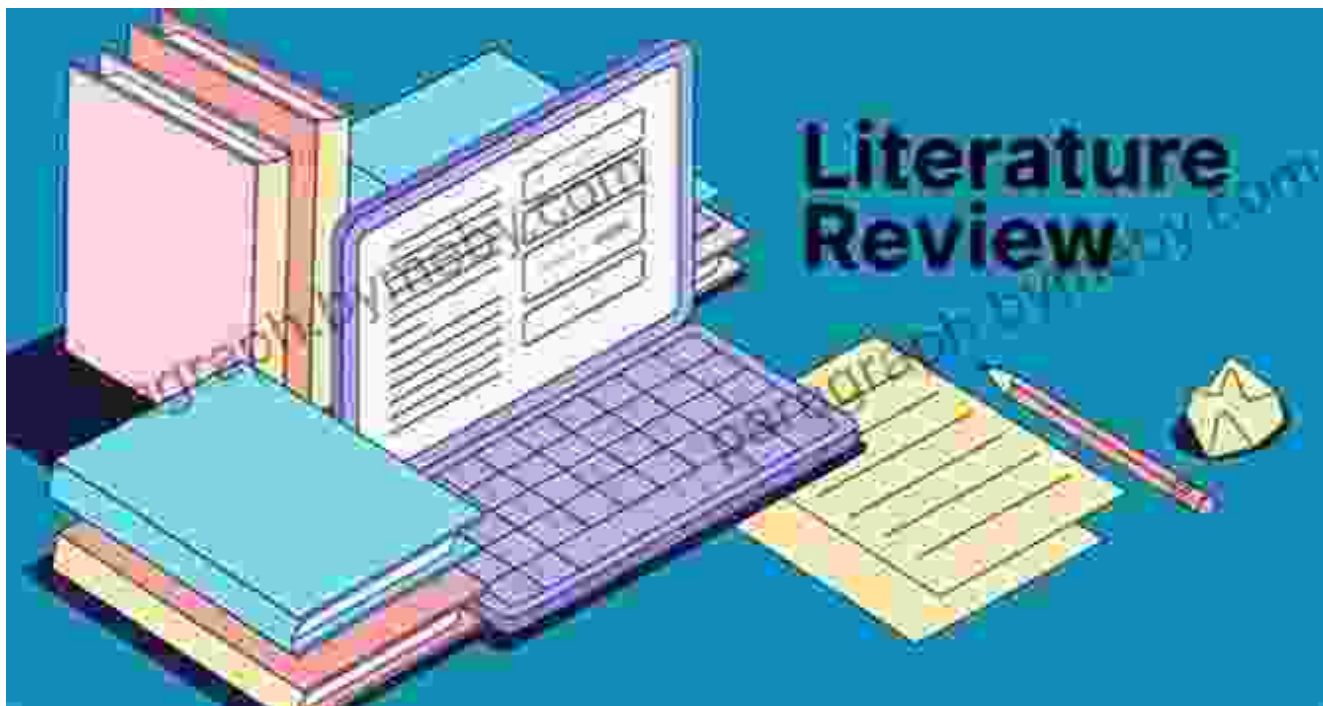

- Systematic searching of the literature
- Critical appraisal of studies
- Data extraction and synthesis
- Writing a systematic literature review

This book is an essential resource for researchers who are conducting literature reviews. It provides a comprehensive overview of the traditional and systematic techniques used in literature reviews, and it includes step-

by-step instructions, examples, and tips to help researchers conduct effective literature reviews.
