

The War on Wheels: The Inside Story of the American Car Industry's Battle Against Environmental Regulation

In his groundbreaking book, *The War on Wheels*, environmental journalist Joseph White tells the inside story of the American car industry's battle

against environmental regulation. Drawing on extensive research and interviews with key players, White reveals how the industry used its political clout and financial resources to delay and weaken environmental standards, putting the health of Americans and the planet at risk.

The War on Wheels is a gripping tale of corporate greed and political corruption. White shows how the car industry spent millions of dollars on lobbying and campaign contributions to buy the support of politicians and regulators. He also reveals how the industry used its media connections to spread disinformation about the dangers of environmental regulation.
